

Simple to Use

Code pad options:

LCD ICON - small & inobtrusive. Simple icons make it easy to identify the status of the system at all times

LCD Alphanumeric - displays information in real text to quickly identify the cause of any alarm

Touchscreen - turns your alarm panel into a true lifestyle product. Simple to use. Includes additional feature aesthetics. Available in 7" and 4" options.

Remote Security Control App - allows full control of your alarm panel through your AndroidOS or IOS smartphone, arm, disarm, trigger outputs to run external devices (eg. roller doors, air conditioning, smart lighting etc).

Wireless Options:

Solution 2000 - wireless keyfobs to arm, disarm, control external outputs & trigger panic alarms

Solution 3000 - integrates with Bosch RADION wireless transmitters including motion sensors, door & window switches and remote keyfobs.

Making installations easy

Use a Direct Link Adaptor to:

create a direct connection to the panel via A-Link Plus software and a PC USB

provide a simple way to flash panel firmware to the latest version

Use as a programming key - the DLA holds up to 3 pre-programmed panel configurations

Features

A solution where the important features include:

8/16 Fully Programmable Zones

User codes:

Solution 2000: Up to 21 user codes

Solution 3000: Up to 32 user codes

16 Wireless Devices (on Solution 3000)

Partitionable into 2 Separate Areas

STAY / AWAY Arming Options

Selectable Reports per User Code
Entry and Exit Warning
Automatic Arming
Remote Arming
Zone Lockout

LCD Icon, LCD Alphanumeric, and Touchscreen options
4 Programmable Outputs
Dynamic Battery Test
Day Alarm
Walk Test Mode
Back to Base Reporting
Domestic Reporting
Dual Entry Timers
AC Fail Supervision
Phone Line Supervision

Flexibility

Supporting up to 8 fully programmable zones on the Solution 2000 and 16 fully programmable zones on the Solution 3000 range of intrusion panels is suitable for any home, and even some commercial premises.

With support for up to four codepads on both panels and the ability to be split into two separate partitions on the Solution 3000 you have the flexibility of one security system that can act as two. Both the house and garage/ granny flat can be one system at one cost. Each partition can even report to a different monitoring centre if desired, making it ideal for multi-unit premises.

Communication

While offering traditional telephone line reporting, the Solution 2000 & 3000 also have available a range of communication extension modules that integrate directly with the panel and provide options such as mobile communications via GPRS networks, along with IP reporting through the Internet. The IP connection option makes the panel fully NBN compatible, offering the higher security of polled monitoring with no call costs.

Applications

Ideal for use in:

- Residential properties, including those with granny flats
- Duplexes
- Small commercial properties, including home businesses
